About

QuarterCon is a signature, one day, quarterly cybersecurity conference targeting senior level professionals across all industries in Africa, and internationally.

The conference gathers cybersecurity community elite to talk priorities, trends, ideas and most-pressing challenges for security leaders, now and over the horizon; delivering in-depth, comprehensive and actionable information that provokes thought and inspire actions for cybersecurity changes in organizations.

Mission

QuarterCon seeks to enable industry leaders shape the future- not get lost in the crowd. QuarterCon is a vendor-neutral conference with no sales pitches. All content is subject matter focused equipping participants with knowledge and tools to deal with current and yet-to-come security challenges.

THE X-FACTORS

Happening four times a year, QuarterCon offers conference goers more opportunities to share actionable insights, build relationships, collaborate and work towards achieving the shared goal of helping secure a safer society and world, now and in the future, together. The conference leverages our expanding industry relationships and brand equity in the security eco-system in Africa.

QuarterCon provides latest and high-level training for the security community as the best minds in the industry development discuss trends and tactics. The Con is a comprehensive experience with diverse pre- and post-conference engagements for stakeholders.

QuarterCon seeks to enable industry leaders shape the future- not get lost in the crowd. QuarterCon is a vendor-neutral conference with no sales pitches. All content is subject matter focused equipping participants with knowledge and tools to deal with current and yet-to-come security challenges.

Q2/2020 Experience

This conference comes amid a global health crisis that has impacted the cybersecurity sector by creating the perfect storm for a heightened increase in cyber criminal activities.

In this totally unanticipated state of chaos, how can security professionals and particularly leaders take action now, with the changes that must be made and the rising difficulties, to streamline, optimize and adapt their security operations and programs.

The Q2/2020 conference will focus on inspiring change by empowering senior level professionals to proactively take actions, even now, to survive this season's cyber crisis and to always be ready for the next one. After all, cybersecurity has no season, for it's always a cybercrime season.

THEME

TAKING ACTION, NOW

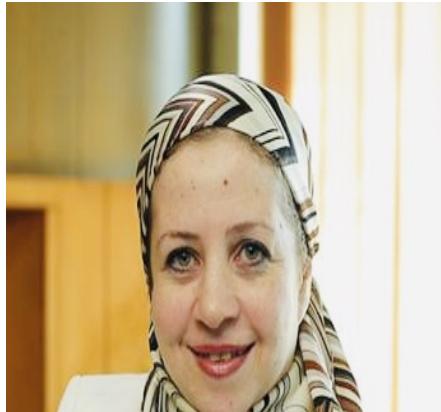

Be Proactive. Have a sense of urgency.
